	2100 - 6'11"	£385	£415	£439

Large & Custom Bridges

On this page you will find just a few examples of larger custom pedestrian bridges and light vehicle bridges we manufacture. All these bridges are made to order in a variety of colours and finishes. You can have any specification foot bridge imaginable, from any wood type.

Materials & Limitations

All of our wooden bridges are constructed from pressure treated (tanalised) wood, available in two shades. Tanalised wood can be left outside year round and will not require painting, however painting will increase the bridge's life span. Our garden bridges can also be stained or painted to different colours as with any wood. The decking boards that form the walkway are grooved to prevent your feet slipping in wet weather. All of our pedestrian bridges are available in two different shades of tanalised colour. Brown (top) and Natural (bottom) as shown in the picture below. All screws and other fixings used on our wooden bridges are treated to prevent corrosion.

Below you will find a table showing the maximum load bearing limits of each garden bridge sold on our website. These limits are not to be exceeded at any time or this may result in failure of the wooden bridge and personal injury and is also in breach of our terms and conditions.

These limits are only for bridges installed correctly on the foundations specified in the installation page, as any substandard foundations may weaken the bridge.
